Click the - symbol located under the pie chart. Mac Os Partition FormatMac Os Partition DisappearedPartition Os DriveMay 25, 2016 What you can do is take out the hard drive and attach it via USB and try to boot from it.. Connect a partitioned USB drive to your Mac Open Disk Utility Select the partition you want to remove, and click Partition.

Oct 07, 2019 If you've always wanted to partition your Mac's hard drive so you can run a separate operating system — including the launch of macOS Big Sur — in tandem with your current one, it's surprisingly easy to do so thanks to Apple's built-in disk utility program.. We went with OS X Installer, since that's basically what it will be, and next to Format, pick.. If it boots normally then the hard drive cable inside is bad Cheap fix, new cables are less than \$50 on.
