## Thesis Abstract Keywords

The Discussion should also relate your specific results to previous research or theory.. Results Outlines what you found out in relation to your research questions or hypotheses, presented in figures and in written text.. It is an overview of your whole thesis, and is between 200-300 words See writing abstracts for honours theses for what to include in your abstract or see some example abstracts.. Subjective The abstract contains a very clear declaration of the heart and soul of the thesis.. Literature review Often part of the Introduction, but can be a separate section Outlines which method you chose and why (your methodology); what, when, where, how and why you did what you did to get your results.. The problem or queries worked with, the strategies of investigation used, and the common conclusions are usually stated right here.

Often you will include a brief comment on the significance of key results, with the expectation that more generalised comments about results will be made in the Discussion section.. Abstract The abstract contains a apparent statement of the importance of the thesis.. Outlines which method you chose and why (your methodology); what, when, where, how and why you did what you did to get your results.. Sometimes Results and Discussion are combined: check with your supervisor and with highly rated past theses in your School.. Summary size maximums:. Conclusions Very important This is where you emphasise that your research aims/objectives have been achieved.. You should point out what the limitations were of your study, and note any questions that remain unanswered.
