[*gasp!* RSS On iPod](#)

The screenshot shows the PodPlus application window. The title bar reads "PodPlus". The menu bar includes "File", "Settings", and "Help". Below the menu bar are buttons for "Add", "Remove", "Sync Movie Showtimes (USA)", and "Sync All".

The left sidebar contains a list of categories: "My Information", "Internet Information", "Daily Horoscopes", "Movie Showtimes (Canada)", "Movie Showtimes (UK)", "Movie Showtimes (USA)", "Podcasts", "RSS News Feeds", and "Weather Forecasts (USA)". The "Movie Showtimes (USA)" category is selected.

The main content area is titled "Movie Showtimes (USA)". Below the title is a descriptive text: "You can get showtimes for theaters throughout the United States. You'll be able to view the showtimes for selected theaters on your iPod either by theater or by movie." Below this text is a table with columns: "Sync", "Theater", "Location", "Zip Description", and "Zip Code". Two rows are visible, both with "Sync" checked and "Home" as the "Zip Description".

Below the theater table is a scrollable list of movies with columns: "Date", "Title", "Rating", and "Show Times". The list includes movies like "40 Year-Old Virgin, The", "Broken Flowers", "Brothers Grimm, The", etc.

At the bottom of the window, there is a status bar with the text: "found as drive X: Last sync: never Dock Sync Off Scheduled Sync Off".
